SKILLS

Languages

TypeScript, JavaScript, Python, Java, C, C++, C#

Frameworks

NestJS, Next.js, React, Fastify, Django, Spring Boot, ERPNext / Frappe

Platforms

GoHighLevel, Shopify

Database & Infra

PostgreSQL, MySQL, MariaDB, Oracle, Docker, AWS

DevOps

Server provisioning from bare metal, deploy user and SSH setup, Git based deployment, Docker, Nginx, Ubuntu server administration

TOOLS

Claude Code, Codex, DeepSeek harness

FOCUS

Custom software development: web products, APIs, and ERP systems.

GoHighLevel marketplace apps, workflow automations, and agency integrations.

Tahsin Ahmed Refat

Full Stack Developer | Custom Software Development & GoHighLevel Solutions

SUMMARY

Full stack developer specializing in custom software development: web products, APIs, and ERP systems built end to end on Next.js, NestJS, and PostgreSQL. Also builds GoHighLevel marketplace apps, workflow automations, and integrations for agencies. Currently developing two independent products alongside client and product work.

EXPERIENCE

Software Developer | Softwarelify (formerly SpaceSoft Ltd)

Aug 2025 - Present

- Build custom web products, APIs, and internal tools for clients using Next.js, NestJS, Fastify, and PostgreSQL.
- Develop GoHighLevel marketplace apps, snapshots, workflow automations, and integrations for agencies.
- Contributed to five shipped products: **Rankflo**, **Salestial AI**, **JSON Parser Pro**, **Zoom Workflow Actions**, and **Provelify**.
- Sole developer of **JSON Parser Pro** and **Zoom Workflow Actions**, two GoHighLevel marketplace apps built end to end: the first extracts values from JSON payloads for use in workflows, the second creates, reschedules, and cancels Zoom meetings from workflows with two way sync.

Junior Full Stack Engineer | Fusion Infotech Ltd

Nov 2024 - Aug 2025

- Implemented and customized ERPNext modules for client businesses.
- Worked across the stack on internal tools and client requirements.

EDUCATION

BSc in Computer Science and Engineering

2024

Military Institute of Science and Technology (MIST)

PERSONAL PRODUCTS

RedLine (In Development)

- Cloud based compliance management platform for ready made garment factories in Bangladesh. Tracks licenses and certificates, corrective action plans, buyer requirement matrices, and self assessment questionnaires, with automated exactly once expiry reminders.
- Stack: Bun, Turborepo, React, NestJS, Supabase (Postgres, Auth, Storage, RLS), Drizzle ORM, Resend.

TourAxis (Co-developed)

- B2B travel sourcing marketplace connecting travel agencies, in-house operators, and local in-country agents. Operators turn agency briefs into tour requests, agents pitch priced packages, and operators resolve a winner through realtime negotiation.
- Built full stack solo; a marketing partner handles the commercial side.
- Stack: Bun, Turborepo, Next.js, NestJS, Supabase (Postgres, Auth, Realtime), Drizzle ORM, Zod.
